implementing SSO with eva

Make login secure and convenient

By implementing SSO with EVA, users can conveniently use a single set of credentials to log into multiple platforms. With the common user identity, EVA can authorize a seamless authentication process for the members.

Steps of the SSO Authentication Process

Meeting Planners + Developers = Winning Team for Your Virtual & Hybrid Conferences.

EVA's platform focuses on streamlining virtual content that is easy to access and promotes attendee engagement. Our team of virtual producers and developers provides white-glove service to alleviate the technical burdens of implementing virtual solutions.
